yes recursively deep into NPIC
detailed operations -

Based upon concept that 'new' Ad Com would function as a 'high-level' 'all-agency' "planning" group for the Director of NSIC - Hopefully providing guidance as to:

- (a) Priorities of NPIC work - P1 and non P1 -
- (b) NOSC growth - anticipating sensor readouts of the future - manpower - training - support -
- (c) Pipeline of info as to all Agency P1 efforts to eliminate unnecessary duplication
- (d) Feedback to NPIC 'consumers'
- (e) Pipeline of info on matters of concern to NPIC - ~~any area~~ - any system) etc.

Such an Ad Com would have to be "told" at outset

- a. NPIC history - reason for being - role - etc
- b. NPIC method of operation - how supported - training - relationships to Departmental "in-house" - etc
- c. The Ad Com role and reason for being - method of operation etc
- d. Out of above to be emphasized -
 Responsibilities of Director NPIC -
 His obligation to accept and/or reject
 Ad Com recommendations -
 etc

soft
pedal

Such an Ad Com would hopefully have the effect of:

- (a) Emphasizing "National Issue NPIC for Bureau of Budget etc
- (b) Assuring NPIC contributors - sources - that they have "a hand" in NPIC operations as a "National" concern -
- (c) Surface and correct such matters as NPIC under DDI - Ad Com refs to be under Agency sub (C.A. 11.11.11.11) -

etc

Based on foregoing

Re A.J. Stute memo

1. Duties 1. Should be routine for Secretariat after initial 'broad priorities' agreements - incl handling 'crush' imposed by the DCI and/or DOD (the DIA) ~~and~~. In any event require work to be done outside meetings to minimize waste of time etc & ~~maximize~~ Ad Com concentration on more fruitful (for NPIC) areas -
2. Duties 2. good point - if kept 'high level' -
3. Duties 3. good point - if Ad Com members are expected to know what the people they represent really need and can use - Again if kept 'high level' and stay out of unnecessary unimportant details: e.g. ~~informat~~ some idiot could be carried away by color size etc and ~~invaluable time~~ -
4. Duties 4. Excellent - this can force members to be representative & knowledgeable -

State memo (cont)

5. Procedure 1. danger - if allowed to argue about and dwell on details - however basic 'rules' + broad priority + will tend to prevent -

6. Procedure 2. Good idea - a JCS type of pre-paper stuffing will tend to lead to unnecessary detail and leave Ad Com looking at broader issues -

DIA Talking Paper

1. Like the NSCID No. 8 approach - elevates Ad Com to a desirable higher level -
2. Re 2. NPIC Responsibilities (a) (2)
the concept of NPIC initiating work and going to Ad Com when meeting a priority difficulty and Ad Com providing general policy guidance - is most excellent - this elevates Ad Com & keeps them out of unnecessary details - although they will be informed
3. Re 2. NPIC Responsibilities (b) (2)
Responsibility for common terminology - good idea - the National center should be (the best informed) (in the best position) the one to carry any ball on matters of common concern - [using the Ad Com] - not "dictating" but "coordinating" -
4. Re 3. Departmental & Agency Responsibilities (a)
why not explore getting personnel from other Agencies? NSA - State - etc but you could get some valuable assets -

DIA Talking Paper (cont)

5. Re 3. Dep + Agency Resp (c) Agree but Ad Com members can be a source of info on such photo - we aren't always sure now that we know about all photo which we might use -

6. Re C. Recommended Ad Com Resp + Functions

Looks very good - might meld with Secretariat + Steele memo - but keep BROAD -

7. Re Composition of Ad Com 2.

Agree NPIC should permanently chair + that Clee Dir should be it - admit possible dangers eg ^{"criticism that"} Ad Com is

merely a "spokesman" for NPIC - ~~rather~~ than an advisory group to NPIC -

However this, of course, can be avoided - Believe more to be gained than lost -

In a sense Ad Com should be a feedback spokesman for NPIC - but not a rubber stamp

8. Re Composition of Ad Com 3.

Concur - depending on outcome of "making" Ad Com members speak for entire Agency they represent

9. Re DIA Talking Paper F. Comp of Secretariat
Good idea - suspect this will wind up
functioning like "old" (present?) Ad Com
leaving the "new" Ad Com to function
at higher level -

Secretariat Proposal

Re NPIC Ad Com

2. & 3. Should be done at outset -
well planned - ^{to provide} a basis for
future individual problems -

4. Imagine this would really be
done by Secretariat re
DIA concept

5. Kept 'high level' -

6. Good idea - maybe 1st
action of new Ad Com - after
full exchange of info briefings -
& then probably stopped by
Secretariat & merely approved
by Ad Com - Keep Ad Com
high level -

Re Secretariat

5. volunteer basis maybe - But
Ad Com members to convince their
Agency of the value & National
responsibilities to prevent duplication
which they share with NPIC

Ad Com

Secretariat

whoever heads this will in a sense be running PAG - unless it is merely a 'rubber stamp approval' to what PAG wants to handle -

Chairman

XO NPIC - good idea since this is control over total NPIC efforts including PAG

Members

CIA (Should be able to speak for all of CIA - otherwise recommend members as necessary)

DIA (Can be from DIA XX if can speak to DIA Prod Center - otherwise recommend two from DIA)

STATE (Should speak for ACDA)

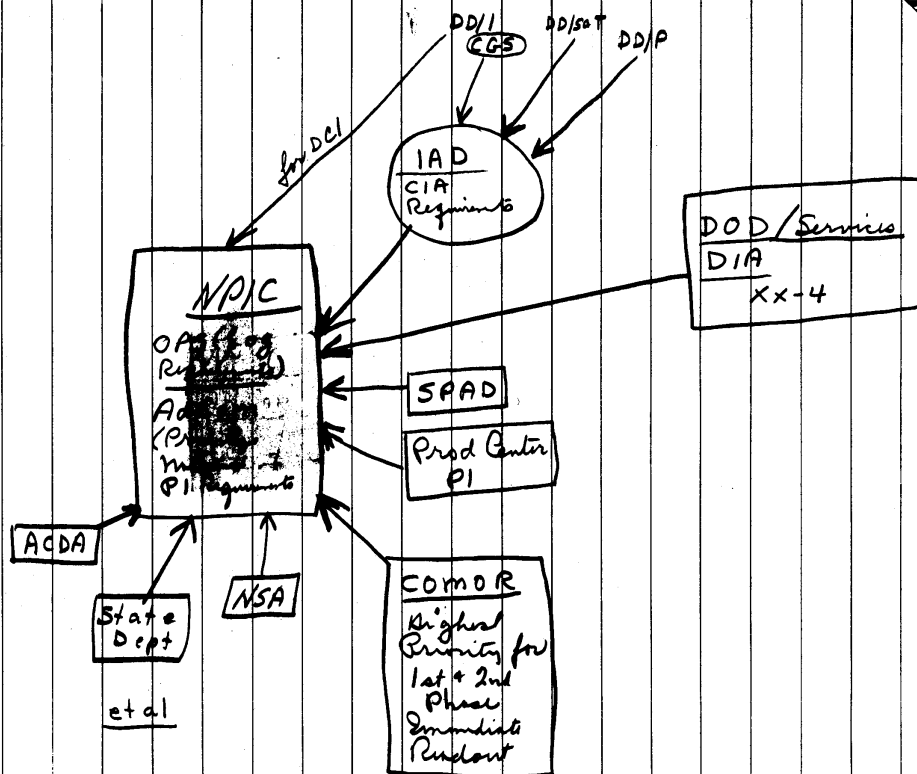

NSA

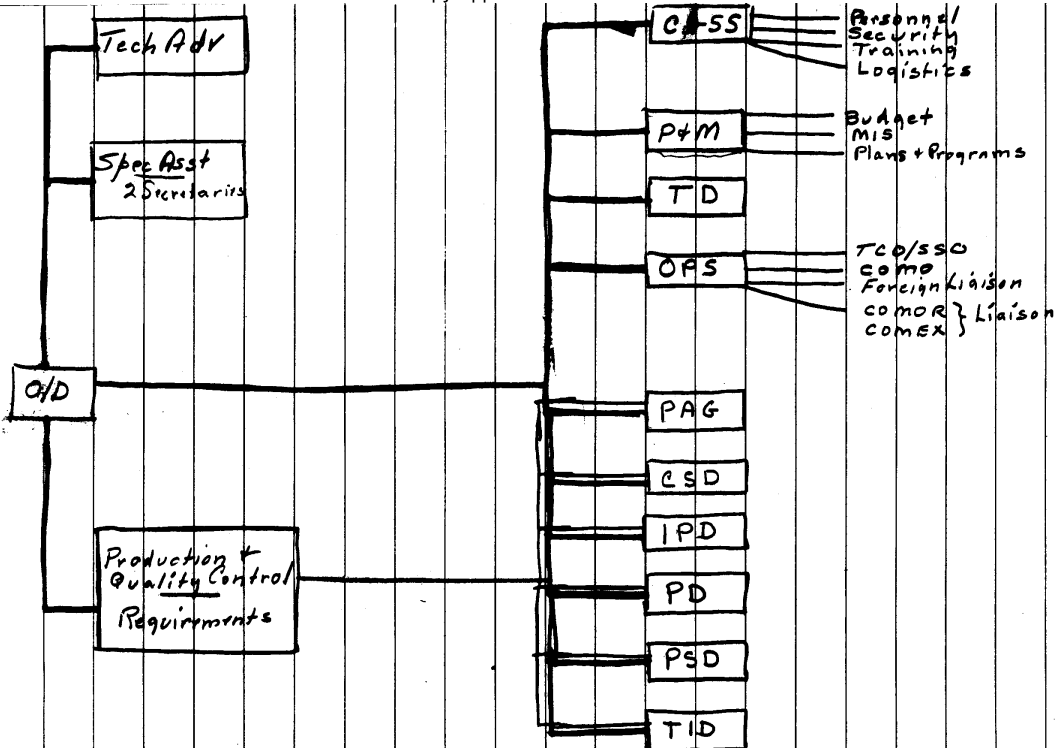

NPIC (from PAG)

Army

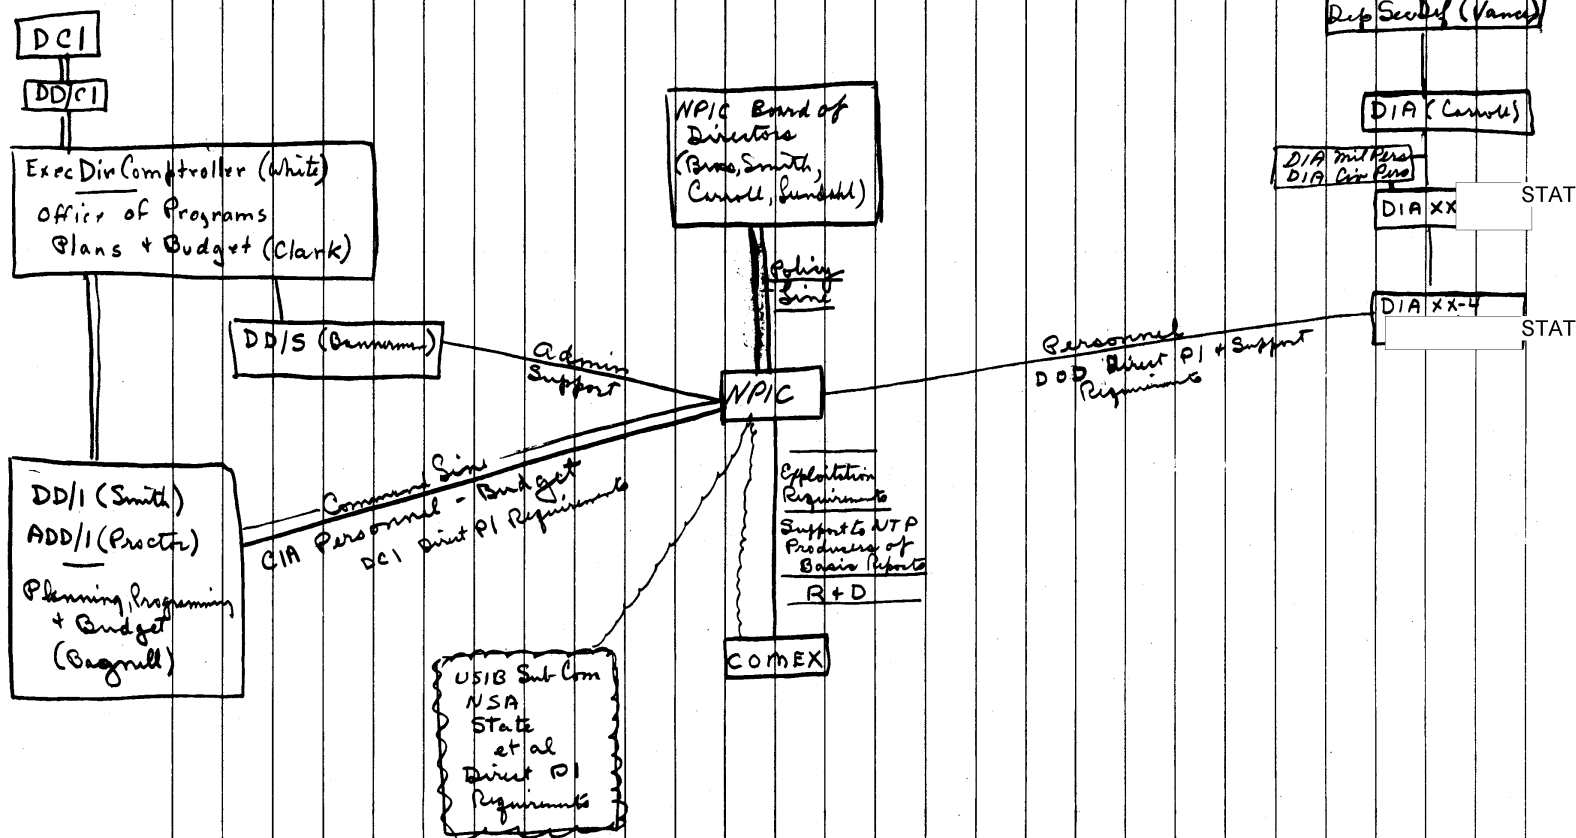

Navy

A/F

Eventually change title from NPIC to
NIAC (National Image Analysis Center)

Military Capabilities

- Deployed Strategic SSN Facilities
- Deployed AMM Facilities
- Deployed Comm/Elec/Radar Facilities

Economic military

- Strategic Weapons
- Industrial Facilities

Atomic Energy

- Atomic Energy Facilities

Scientific & Technical

- Missile Ranges - Strat. SSN + Space Fac
- Missile Ranges - Air Launched Fac
- Missile Ranges - Naval Launched Fac
- Missile Ranges - Tactical SSN Fac.
- Missile Ranges - SAM/AMM Fac.
- Comm/Elec/Radar R & D Facilities
- CBR Facilities
